

# RAJALAKSHMI ENGINEERING COLLEGE

[Department of computer science and engineering]

## ASSIGNMENT -02

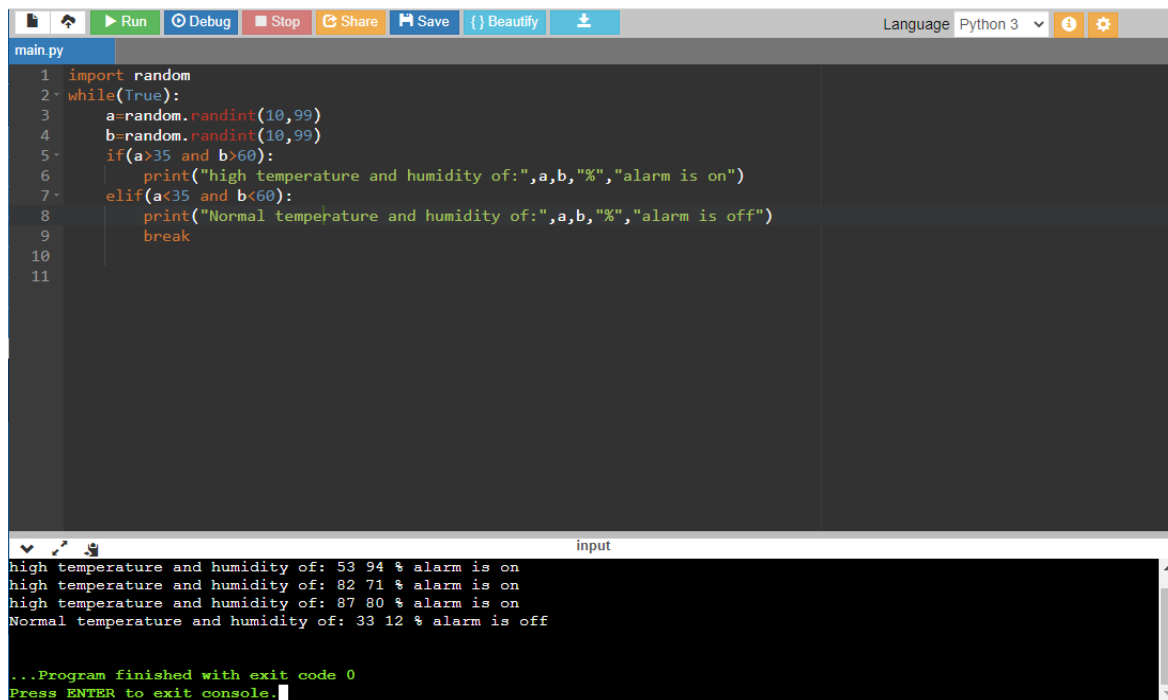

NAME: K HEMAMALINI

TOPIC: Temperature and humidity sensing and alarm automation using python

CODE:

```
import random
while(True):
    a=random.randint(10,99)
    b=random.randint(10,99)
    if(a>35 and b>60):
        print("high temperature and humidity of:",a,b,"%","alarm is on")
    elif(a<35 and b<60):
        print("Normal tempeature and humidity of:",a,b,"%","alarm is off")
        Break
```

OUTPUT:

The screenshot shows a Python IDE window titled 'main.py' with a toolbar at the top containing buttons for Run, Debug, Stop, Share, Save, Beautify, and a download icon. The language is set to 'Python 3'. The code in the editor is as follows:

```
1 import random
2 while(True):
3     a=random.randint(10,99)
4     b=random.randint(10,99)
5     if(a>35 and b>60):
6         print("high temperature and humidity of:",a,b,"%","alarm is on")
7     elif(a<35 and b<60):
8         print("Normal tempeature and humidity of:",a,b,"%","alarm is off")
9         break
10
11
```

Below the editor is a console window titled 'input' showing the output of the program:

```
high temperature and humidity of: 53 94 % alarm is on
high temperature and humidity of: 82 71 % alarm is on
high temperature and humidity of: 87 80 % alarm is on
Normal tempeature and humidity of: 33 12 % alarm is off

...Program finished with exit code 0
Press ENTER to exit console.
```
